Please Direct All Correspondence to Customer Number 20995.

As a below named inventor I/we hereby declare that:

I/We believe the original patent to be wholly or partly inoperative or invalid, by reason of the patentee claiming less than I/we had the right to claim in the patent. At least one error upon which reissue is based is described below.

The error is that I/we claimed less than I/we had the right to claim. Specifically, it was an error to include the limitation "a pair of laterally spaced longitudinal members . . . having upper and lower generally planar portions . . ., said upper portions forming substantially convergent planes in an upwardly extending direction above said one or more web member . . ." within claim 5, as that limitation is not needed for the patentability of claim 5. Newly added claim 36 differs from claim 5 in that it recites the invention including "an upper portion in the heel section of each support member, at least part of each upper portion being generally planar and lying in a plane that is inclined relative to the lower portion, the upper portion planes being convergent in an upwardly direction above said one or more web member . . ." rather than the requiring both the forefoot and heel section having an upper portion inclined relative to the lower portion as required in claim 5.

This and every other error in the patent that was corrected in the present reissue application, and which is not covered by the prior oaths and/or declarations submitted in this application, arose without any deceptive intention on the part of the applicant.

By signing below, I/we hereby declare that all statements made herein of my/our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under 18 USC 1001, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
